

# Swing™

B R E A S T P U M P

## How do babies nurse?

Studies have shown that babies nurse in two phases:

- Fast and light sucking to start the milk flowing
- When the milk starts flowing, babies switch to a slower, deeper suck to get as much milk as quickly as possible

Only Medela's patented 2-Phase Expression® technology is proven most to mimic a baby's natural nursing rhythm.

## Stimulation Phase (Phase 1)

Fast and light to start the milk flowing

## Expression Phase (Phase 2)

Slower and with more vacuum to express milk gently and efficiently

Swing is the only personal-use, single electric breastpump featuring 2-Phase Expression technology

## Advanced Technology

- The combination of stimulation and expression phases, found only in 2-Phase Expression is designed to get more milk in less time\*
- Adjustable speed and vacuum make it efficient and comfortable

## Designed for Mobility and Comfort

- Compact and lightweight – easily fits into a purse or briefcase
- Use on a table-top, belt clip or shoulder/neck strap
- Massaging SoftFit™ breastshield provides a comfortable breastfeeding experience

\*When pumping at Maximum Comfort Vacuum

## Swing includes:

- 2 Bottles and lids
- 1 Bottle stand
- SoftFit™ breastshield
- Carry bag
- Neck/shoulder strap
- AC adapter
- Battery power (4 AA batteries not included)
- 1 year limited warranty on motor and 90 days limited on other parts
